- **LEBANESE UNIVERSITY**, LEBANON   2011-2014
  BACHELORS DEGREE IN COMPUTER SCIENCE

  (IQAS assessed equivalent to three-year Bachelor of Science degree with focus in Computer Science)

TECHNICAL EXPERIENCE

➢ **Freelance work:**

- I created a C# desktop application for a Carpet cleaning small business, that will organize their business and keep all their information in one place.
- Wrote queries to create, read, insert and update database.
- Designed database tables to store application data.
- They can add, update new customers or services.
- The user can search for any customer using phone number or going through a list of names; they will be able to browse the history of orders and details for each customer that will decrease search time by 40%.
- Make a new invoice for the customer that saves customer and invoice information in database and browse the customer order history.
- Added a print button for invoices.

➢ **School project:**

- I created a website for a travel agency using HTML, CSS, PHP and JavaScript where the customer can browse, book packages dynamically loaded from the database and register their information to be dynamically saved to the database.
- Created a web form application using Asp.net where the user can Register, login to their profile to browse through their history of orders and update their information.
- Created a desktop application using C# for the agents
  Packages are displayed so the agent can search edit a package.
  The agents can browse through available products, edit or add new products.
  Each product is linked to a supplier which are also displayed.

WORK EXPERIENCE

➢ **ADMINISTRATIVE ASSISTANT**   2014-2016
  HETC

- Provided exceptional support to managers and co-workers which increased overall efficiency
- Supported other departments which was highly admired by the General Manager
- Introduced a user friendly electronic filing system which reduced file retrieval time by 30%
